Father Of Accountancy

Xero wanted something completely unique to celebrate the launch of their new software programme. They wanted to connect the past with the present and so decided on showcasing the journey of man in it's technological advances.

We created this replica mixed with modern computers and software from the original painting titled 'father of accountancy' by Luca Pacioli .

The artwork is now proudly situated in their head office to remind them of their own personal journal to become one of the countries biggest providers of financial security.

The Grand Tour

For the release of the popular TV show - The Grand Tour on Amazon Prime, we were commissioned to create an original oil painting of the cast - James May, Richard Hammond & Jeremy Clarkson, next to famous explorers of the 16th century. Thomas Cavendish, Sir Francis Drake and Sir John Hawkins.

The artwork represented the idea of exploration, new discoveries and showcasing how far the world has come on its journey of discovery in the natural world.
